

Features & Benefits

- Partner with GA-1 gateway to dim hundreds of fixtures
- Operates up to 40 LED fixtures per dimming control
- Battery backup

Specifications

Input power:	100-277V, 5A
Output:	0-10V, ma 15mA
Max # of fixtures per circuit	40
Ingress protection:	IP65 (Water Resistant)
Warranty	3 Year

Setup

- Assure that all fixtures in a series are orientated such that the female connectors are facing the same direction
- Connect all fixtures within a group using control cables CC-5-1
- Plug end of control quick connect into first fixture in series (into control input)
- Insert CD-1 control power plug into 120V to 277V outlet. Note: Outlet must have constant power
- Follow directions on Gateway (GW-1) to download App onto phone or laptop and to make Zigbee connection between controller (CD-1) and gateway (GA-1)
- To reset controller, plug and unplug main power plug from controller rapidly 5 times. Fixture lights will dim several times to indicate that reset has been conducted properly.
