

Features & Benefits

- Easily connects PPF Tech fixtures to a variety of control brands having RJ12 output
- Quick connect, damp rated M16 connection

Electrical

- For 0-10V control only (on/off/dim)

Mechanical & Safety

- Length: 5 feet

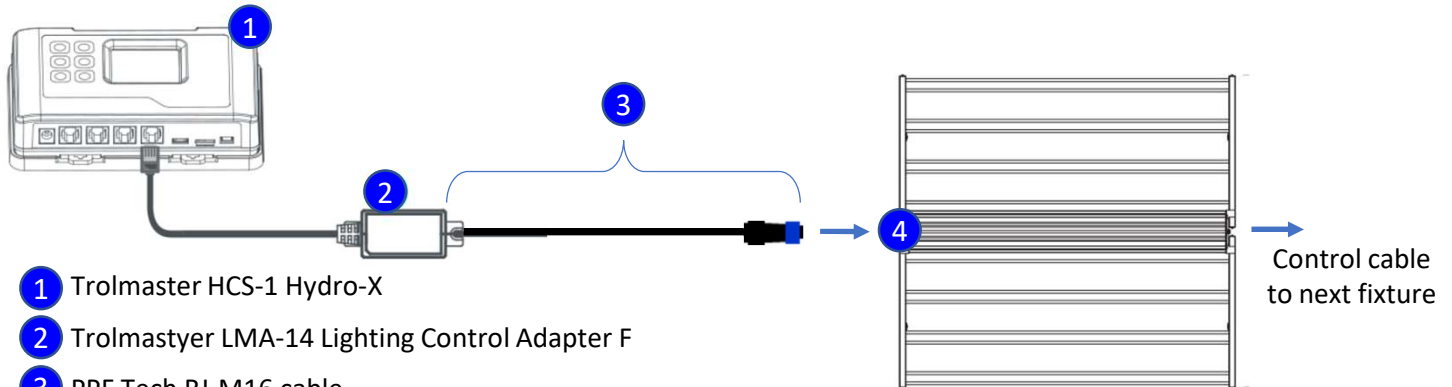

M16 Connector

- Connect to first fixture

RJ12 Connector

- Connect to CD-2 control

Trolmaster HCS-1 Hydro-X Setup

- 1 Trolmaster HCS-1 Hydro-X
- 2 Trolmaster LMA-14 Lighting Control Adapter F
- 3 PPF Tech RJ-M16 cable
- 4 Control input on PPF Tech fixture

When troubleshooting, first check the RJ to LMA-14 connection by setting the Trolmaster control to 25% dim and pushing the RJ side of the RJ-M16 cord fully into the LMA-14 socket. Fixtures will alternate between bright and dim if this connection is loose. If needed, secure this connection with zip tie or electrical tape.
