

Features & Benefits

- Provides secondary temperature sensing area for controlled grow environment
- Quick connect to existing CD-3 control device

Electrical

- Temperature sensing only

Mechanical

- Length: 16 feet

Setup

- Connect terminal end of temperature sensor into Main 'T1' or Aux 'T2' receptacle on back end of CD-3 control (See Fig A)
- Zip tie or wire temperature probe at desired area and height to be monitored.
- Cover temperature probe with a simple cone made from paper or cardboard to protect probe from direct light and radiation. (See Fig B)
